

I listen to K-Love 91.3 San Antonio. This station is the only station my family listens to because it provides positive and encouraging music and news. If we were to lose this station there is no other alternative station, and the airways would become useless to my family. K-Love not only plays music, but provides local information and public service announcements that I could not get from any other station. K-Love is family friendly and safe, and we do not have to worry about our children being subjected to questionable material.
